

Educational Experience

Dr. R. Sarchami
PhD Higher Education Administration

What learning experience can you create?

- ✓ Individual project
- ✓ Group work
- ✓ Site visit
- ✓ Research assistance
- ✓ Mini-lecture
- ✓ Library research
- ✓ Meeting with experts
- ✓ Book summarization
- ✓ Report writing
- ✓ Journal writing
- ✓ Case presentation
- ✓

Apprenticeships

Apprenticeships provide students an opportunity to try out a job, usually with an experienced professional in the field to act as a mentor.

Mentorship

is a relationship in which a more experienced or more knowledgeable person helps to guide a less experienced or less knowledgeable person.

Clinical experiences

Clinical experiences provide hands-on experiences of a predetermined duration directly tied to an area of study.

Field work

Field work allows students to explore and apply content learned in the classroom in a specified field experience away from the classroom. Field work experiences bridge educational experiences with an outside community.

Study abroad

Study abroad offer students a unique opportunity to learn in another culture, within the security of a host family and a host institution carefully chosen to allow the transfer of credit to a student's degree program.

Undergraduate research

The goal is to involve students with critical questions, empirical observation, cutting-edge technologies, and the sense of excitement through a scientific approach.

The integration of the digital and physical situations also provides students with a different type of experience.

The following issues can also make a better experience from university:

- ✓ The general atmosphere of the university and the school
- ✓ Faculty relationship and support
- ✓ Faculty satisfaction and energy
- ✓ Active and energetic departments
- ✓ Active student unions
- ✓ Social/scientific events in university
- ✓ International relations and collaborations
- ✓ Students' active and occupied time for academic assignments
